

Ball Valves **METAL SEATED**

Certificates of the company

ISO 14001	Environmental Management System
ISO 9001	Quality Management system
API Monogram	API Q1 & API-6D
ISO 45001:2018	Health & Safety

Certificates of the product

DNV	Type approval
Lloyd's Register	Fire Safe & Type Approval
TÜV A352.09 AD Merkblatt A4	Design of the valves
TA - Luft ISO15848-1 + VDI2440	Stem Tightness for gas emissions
Helium -40 °C	Leeds University test
Directive 2014/68/EU	Pressure equipment directive (CE marking)
Directive 2014/34/EU	ATEX - directive (II2GD c T-)
BS 6364	Valves for Cryogenic Service -196°C
EN 161 / EN 23553 / EN 16678	Automatic quick shut-off valves for Gas/Oil burners and equipment
EAC	TR CU 010 - TR CU 012 - TR CU 032
Sanitary approval (Russian)	Food processing and Pharmaceutical industry
IEC 61508	SIL3 CAPABLE
UKR SEPRO	Ukraine Certificate
DVGW-EN 13774	Valves for gas distribution with MOP 16 bar
API 6D Monogram	Certificate N° 6D-0363
NSF International	ANSI 372
CRN Canada	Registration certificate for Canada

Certifications and tests

- Fire Safe
- Cryogenic Test

Some Company Approvals

- Repsol-YPF (Spain)
- Al Furat Petroleum (Syria)
- Sasol Technology (South Africa)
- EGPC (Egypt)
- China Petroleum (China)
- OMV / Petrom
- Borealis
- Solvay
- Qatar Petroleum (Qatar)
- Petroleum Development Oman (PDO)
- KUWAIT Oil Co. (KOC)
- Zadco (UAE)
- ADNOC
- INOVYN / INEOS
- Neste

General Features

- Floating Ball / Trunnion
- Split body / End Entry / Top Entry
- Full / Reduced bore
- Bidirectional
- Self-cavity pressure relief
- Zero Leakage Class VI according to ANSI FCI 70-02 upon request.
- Spring loaded seat
- Anti Blow out stem
- Antistatic device
- DBB / DIB
- Auto adjustable packing

Coating Materials

Chrome Carbide (CrC)

Chrome Carbide is the standard coating for Pekos ball valves, it is well suited to very high temperature gas or liquid applications and has excellent resistance to wear, erosion and corrosive media. It has certain limitations in chlorine services and wet sulfur.

Hard Chromium (HCr)

Hard Chromium is suited to a wide range of applications in liquids and gases. It is limited to moderate pressures and temperatures. HCr is not suitable for strong acids and, fluids with high chloride content.

Tungsten Carbide (WC-Co)

Tungsten Carbide is very resistant to wear and erosion from slurries, powders, and muds. It works well in cryogenic applications, hydrocarbon gases and liquids, oxygen and dry gas services. It has limitations in corrosive services and condensates.

Cobalt Based Alloy

Cobalt based coating (Stellite) provides an excellent mechanical wear resistance, superior corrosion resistance and a good performance in high temperature (up to 535°C). Stellite is used in a lot of applications in pulp and paper industries and refining applications.

Coating

Grinding

Standards

- Top flange ISO 5211
- Flanges ASME B16.5, EN 1092-1
- Face to face ANSI B16.10, EN 558
- Testing API 598, API 6D, BS6755-1, EN-12266, ISO 5208, ANSI FCI 70-02
- Design API 6D, B16.34, EN-12516, ISO 17292
- Materials according to NACE MR0175
- Leakage Class V Standard according to ANSI FCI 70-02

STEM EXTENSIONS

Simple

- Length 150 mm.
- Only Lever Operated.
- No Stem Packing.
- No gasket between valve & Stem extension.
- Manufactured from bar material.

Standard Z

- Length 150mm.
- Top Flange ISO 5211
- No Stem Packing.
- No gasket between valve & Stem extension.
- Stem guide seal on top.
- Housing in cast material.

Security F

- High Temperature & Low emission
- Length 150 mm.
- Top Flange ISO 5211
- Stem Packing on Top, no packing in valve.
- Gasket between valve & Stem extension.

Up to 640°C

Security F with Fugitive Detector (F1)

- High Temperature & Low emission
- Length 150 mm.
- Top Flange ISO 5211
- Double stem packing
- Gasket between valve & stem extension.
- Grease injector or fugitive detector between the two packings in the stem extension.

Up to 640°C

Metal Seated
